- (a) Populations shown above represent the population at the Census of 30th June, 1954, plus allowances for natural increase and net migration since the Census. As records of interstate and intrastate migration are incomplete, the estimates so derived are approximate and subject to revision after the next Census. Such revision was substantial after the 1954 Census. The metropolitan population is estimated each quarter as accurately as possible with the limited data available for intrastate migration.
- (b) Excess of births over deaths.
- (c) At the end of the period shown.
